Program Start
Game Start
Initialize World
Game State = 0
Initialize Actors
Wall
Access Point
Revive Point
Switch
Player
Enemy
User Selects Start Button
Game State == 0
Start of Turn
Player Moves
Move Left = A or H Key
Move Down = S or J Key
Move Up is W or K key
Move Right is D or L Key
Note:
Instead have player and enemy movement work in parallel, one space at a time?
Reset player
Deny
No
"Confirm Movement?"
Accept
Is spacesMoved == playerMove?
Is Switch occupying this space?
Is Enemy occupying this space?
Player moves there; spacesMoved++
No
Is Wall occupying this space?
Yes
Player cannot move there
Enemies Move, taking a direct or indirect path to Player
Switch actor changes state, Access Point Actor appears or a Wall Actor disappears
Game State = 1
Is Wall Occupying this space?
No
Yes
Enemy moves there; spacesMoved++ per space moved
Enemy cannot move there (Ghosts???)
Combat Start
Player Action
Attack
On success, deal damage
If foeHP == 0, battle won, this.foeIsBeaten = 1 Game State 1
Item
Select item, if any; heal
Run
On success, this.foeIsBeaten = True, player.isBrave= false, Game State 1
Is Player occupying this space?
Yes
Game State = 1
If player.HP == 0:
player.hasGold = False,
player.HP = max, player.Coord = this floor's Revive Point's coordinates.
this.foeIsBeaten = True, Game State 1
go to "Start of Turn"
On success, deal damage
Roll is >= aggression
Enemy Turn
Foe does nothing, giving flavor text
Roll is < aggression
Next Enemy
If spacesMoved == foeMove
Enemy ends their turn
If player.isBrave, Best Ending.
You are reunited with your crewmates and amaze them with your saga.
To Next Floor
Once loaded, go to "Start of Turn"
Does the player share a space with an access point?
Yes
No
Go To "Start of Turn"
Does the player share a space with an escape actor?
No
Yes
Good ending
You win and have gold to offer Ran. You've earned your seat in Aegirheim
hasGold == True
Game State 2
Bad ending
You win, but cannot be accounted for without your gold ring. You are sent out to wander with the rest for eternity.
hasGold == False
Note:
Combat is planned to be handled with a 1d10 roll, plus modifiers for handling accuracy, running, and enemy behavior. Attacking would require a roll of 6 or greater to deal damage, with a natural roll of a 10 dealing double. Fleeing is requires a roll against the enemy's aggression.
